Birds

of

Indiana State Parks

and Reservoirs

Checklist

Great Blue Heron

DNR

Indiana Department of Natural Resources
Division of State Parks and Reservoirs
Interpretive Services

Each Indiana State Park and Reservoir has a unique natural or historic heritage. Among these varied tracts of land you will discover a rich diversity of bird life.

The joys of birding can provide a rewarding experience for the patient observer. Take time to sit quietly or walk slowly down a trail and watch for the more secretive birds.

The state of Indiana is about 153 miles wide and 275 miles long at its most distant points. It lies between 37°40' and 41°50' north latitude and between 84°49' and 88°2' west longitude. The total land and water area contain 36,000 square miles. The highest point in the state is 1,285 feet above sea level. The average temperature is 52 degrees and average annual precipitation is about 39 inches.
